This Prospectus provides important information about the Fund that you should know before investing. Please read it carefully and keep it for future reference.

These securities have not been approved or disapproved by the Securities and Exchange Commission nor has the Securities and Exchange Commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website www.persimmonfunds.com, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by following the instructions included with paper Fund documents that have been mailed to you. You may also elect to receive all future reports in paper free of charge.

FUND SUMMARY

Investment Objective: The Persimmon Long/Short Fund seeks long-term capital appreciation.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	Class I
Maximum Sales Charge (Load) Imposed on purchases (as a percentage of offering price)	None
Maximum Deferred Sales Charge (Load) (as a percentage of purchase price)	None
Redemption Fee (as a % of amount redeemed if held less than 60 days)	1.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	1.75%
Distribution and/or Service (12b-1) Fees	None
Total Other Expenses	1.89%
Short Selling Dividend and Interest Expense	0.95%
Remaining Other Expenses	0.94%
Acquired Fund Fees and Expenses ⁽¹⁾	0.04%
Total Annual Fund Operating Expenses	3.68%
Fee Waiver and Expense Reimbursement ⁽²⁾	(0.20)%
Total Annual Fund Operating Expenses After Fee Waiver	3.48%

(1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies, including exchange traded funds.

(2) The Fund's adviser, Persimmon Capital Management LP, (the "Adviser") has contractually agreed to waive management fees and to make payments to limit Fund expenses, at least until January 31, 2020, so that the total annual operating expenses (excluding (i) any front-end or contingent deferred loads; (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses; (iv) borrowing costs (such as interest and dividend expense on securities sold short); (v) taxes; and (vi) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) of the Fund do not exceed 2.49% of average daily net assets attributable to Class I shares. This fee waiver and expense reimbursement is subject to possible recoupment from the Fund within three years after the fees have been waived or reimbursed, if such recoupment can be achieved within the lesser of the foregoing expense limits or the expense limits in place at the time of recapture. This agreement may be terminated only by the Board of Trustees on 60 days' written notice to the Adviser.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>Class</u>	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
I	\$351	\$1,108	\$1,885	\$3,919

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the fiscal year ended September 30, 2018, the Fund's portfolio turnover rate was 263% of the average value of its portfolio.

Principal Investment Strategies: In pursuing its investment objective, the Fund utilizes two strategies: (i) the selection of individual equity securities based on the Adviser's investment models and (ii) a hedging strategy that seeks to mitigate the downside risk of equities during unfavorable markets.

The Fund seeks to provide risk-adjusted returns with lower volatility compared to global equity markets. Under normal market conditions, the Fund pursues its investment objective by investing at least 80% of its net assets in U.S. exchange listed common stock, preferred stock and depositary receipts ("Equity Instruments"). The Fund may invest in or have exposure to companies of any market capitalization or sector.

In managing the Fund, the Adviser takes long equity positions in those Equity Instruments that, based on proprietary quantitative models, the Adviser forecasts to be undervalued and likely to increase in price. The proprietary quantitative models that are used in the security selection process are based on various value, quality and momentum factors. In addition to these three factors, the Adviser may use additional quantitative strategies based on the Adviser's proprietary research. When warranted, the Adviser uses its dynamic hedging strategy in seeking the downside risks associated with the Fund's exposure to Equity Instruments during bear market conditions in the equity markets. Exposure to the hedging strategy is gained through the selling short of exchange traded equity index futures contracts.

The Fund expects to have net long exposure to equity markets. In deteriorating market conditions, the Fund reduces its long market exposure and implements the hedging strategy. If the Fund's long position in Equity Instruments falls below 75%, the Adviser will purchase equity index exchange traded funds ("ETFs") to maintain the minimum long exposure in the portfolio. As market conditions improve, the Fund may increase its long exposure. The Fund will incorporate a long equity position of between 75% to 100%. The Adviser will use the hedge strategy as a tactical allocation overlay to manage the Fund's overall net exposure. The Adviser expects that the Fund's exposure to equities will range from 10% to 90% net long through the majority of market cycles.

Principal Investment Risks: *As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program. Many factors affect the Fund's net asset value ("NAV") and performance.*

- **Credit Risk:** Issuers may not make interest or principal payments on securities, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes. These risks are more pronounced for securities with lower credit quality, such as those rated below BBB- by Standard & Poor's Ratings Group or another credit rating agency.
- **Emerging Market Risk:** Emerging market countries may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Emerging market economies may be based on only a few industries and security issuers may be more susceptible to economic weakness and more likely to default. Emerging market securities also tend to be less liquid.
- **Equity Risk:** The NAV of the Fund will fluctuate based on changes in the value of the equity securities held by the Fund or underlying funds that invest in U.S. and/or foreign equity securities. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions.
- **Fixed Income Risk:** The value of the Fund's investments in fixed income securities will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. The credit quality of securities may be lowered if an issuer's financial condition deteriorates and issuers may default on their interest and or principal payments. Convertible securities are hybrid securities that have characteristics of both fixed income securities and common stocks and are subject to risks associated with both debt securities and equity securities. Your investment will decline in value if the value of the Fund's fixed income investments decrease.
- **Foreign Currency Risk:** Currency trading risks include market risk, credit risk and country risk. Market risk results from adverse changes in exchange rates in the currencies the Fund is long or short. Credit risk results because a currency-trade counterparty may default. Country risk arises because a government may interfere with transactions in its currency.
- **Foreign Investment Risk:** Foreign investing (including through American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts) involves risks not typically associated with U.S. investments, including adverse fluctuations in foreign currency values, adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards. Investing in emerging markets imposes different or greater risks than those associated with foreign developed countries.

- *Futures Risk:* The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.
- *High Yield (Junk) Bond Risk:* Lower-quality fixed income securities, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. An economic downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund's share price.
 - *Defaulted Securities Risk:* Repayment of defaulted securities and obligations of distressed issuers (including insolvent issuers or issuers in payment or covenant default, in workout or restructuring or in bankruptcy or in solvency proceedings) is subject to significant uncertainties. Investments in defaulted securities and obligations of distressed issuers are considered speculative.
- *Issuer-Specific Risk:* The value of securities of smaller issuers can be more volatile than those of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.
- *Management Risk:* The Adviser's judgments about the attractiveness, value and potential appreciation of particular asset classes and securities in which the Fund invests (long or short) may prove to be incorrect and may not produce the desired results.
- *Market Risk:* Overall securities and derivatives market risks may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign economic growth and market conditions, interest rate levels, and political events affect the securities and derivatives markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.
- *Model Risk:* Like all quantitative analysis, the Adviser's investment model carries a risk that the mathematical model used might be based on one or more incorrect assumptions. Rapidly changing and unforeseen market dynamics could also lead to a decrease in short term effectiveness of the Adviser's algorithmic model. No assurance can be given that the fund will be successful under all or any market conditions.
- *Option Writing Risk:* If a put or call option purchased by the Fund were permitted to expire without being sold or exercised, the Fund would lose the entire premium it paid for the option. The risk involved in writing a put option is that there could be a decrease in the market value of the underlying future, security, currency or other asset. If this occurred, the option could be exercised and the underlying future, security, currency or other asset would then be sold to the Fund at a higher price than its current market value. The risk involved in writing a call option is that there could be an increase in the market value of the underlying future, security, currency or other asset. If this occurred, the option could be exercised and the underlying future, security, currency or other asset would then be sold by the Fund at a lower price than its current market value.
- *Portfolio Turnover Risk:* A higher portfolio turnover will result in higher transactional and brokerage costs.
- *Short Position Risk:* The Fund will incur a, potentially unlimited, loss as a result of a short position if the price of the short position instrument increases in value between the date of the short position sale and the date on which the Fund purchases an offsetting position.
- *Small and Medium Capitalization Risk:* The value of small or medium capitalization companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.
- *Underlying Funds Risk:* Investment companies, including ETFs and mutual funds, are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in investment companies and also may be higher than other mutual funds that invest directly in securities. Investment companies are subject to specific risks, depending on the nature of the fund.

Performance:

The bar chart and performance table below show the variability of the Fund's returns over time, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's Class I shares for each full calendar year since the Fund's inception. The performance table compares the performance of the Fund over time to the performance of a broad-based market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information will be available at no cost by visiting www.persimmonfunds.com or by calling 1-855-233-8300.

Class I Performance Bar Chart For Calendar Years Ended December 31

Best Quarter:	3/31/2017	4.54%
Worst Quarter:	12/31/2018	(9.13)%

**Performance Table
Average Annual Total Returns
(For periods ended December 31, 2018)**

	One Year	Five Year	Since Inception (12-31-12)
Class I shares			
Return before taxes	(6.10)%	1.16%	2.65%
Return after taxes on distributions	(6.85)%	0.34%	1.95%
Return after taxes on distributions and sale of Fund shares	(3.07)%	0.89%	2.05%
S&P 500 Total Return Index⁽¹⁾ (reflects no deduction for fees, expenses or taxes)	(4.38)%	8.49%	12.15%

(1) The S&P 500 Total Return Index is an unmanaged composite of 500 large capitalization companies and includes the reinvestment of dividends. This index is widely used by professional investors as a performance benchmark for large-cap stocks. You cannot invest directly in an index.

After-tax returns were calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Management of the Fund:

Adviser	Portfolio Manager	Title and Length of Service
Persimmon Capital Management, LP	Greg Horn	Portfolio Manager of the Fund since inception
	Arthur Holly	Portfolio Manager of the Fund since August 2014
	Timothy Melly	Portfolio Manager of the Fund since June 2015

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading. The minimum initial investment in the Fund is \$100,000. The minimum subsequent investment is \$100.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Investment Objective:

The Fund seeks long-term capital appreciation. The Fund's investment objective may be changed by the Board of Trustees upon 60 days' written notice to shareholders.

Principal Investment Strategies: In pursuing its investment objective, the Fund utilizes two strategies: (i) the selection of individual equity securities based on the Adviser's investment models and (ii) a hedging strategy that seeks to mitigate the downside risk of equities during unfavorable markets.

The Fund seeks to provide risk-adjusted returns with lower volatility compared to global equity markets. Under normal market conditions, the Fund pursues its investment objective by investing at least 80% of its net assets in U.S. exchange listed common stock, preferred stock and depository receipts ("Equity Instruments"). The Fund may invest in or have exposure to companies of any market capitalization or sector.

In managing the Fund, the Adviser takes long equity positions in those Equity Instruments that, based on proprietary quantitative models, the Adviser forecasts to be undervalued and likely to increase in price. The proprietary quantitative models that are used in the security selection process are based on various value, quality and momentum factors. In addition to these three factors, the Adviser may use additional quantitative strategies based on the Adviser's proprietary research. When warranted, the Adviser uses its dynamic hedging strategy in seeking the downside risks associated with the Fund's exposure to Equity Instruments during bear market conditions in the equity markets. Exposure to the hedging strategy is gained through the selling short of exchange traded equity index futures contracts.

The Fund expects to have net long exposure to equity markets. In deteriorating market conditions, the Fund reduces its long market exposure and implements the hedging strategy. If the Fund's long position in Equity Instruments falls below 75%, the Adviser will purchase equity index exchange traded funds ("ETFs") to maintain the minimum long exposure in the portfolio. As market conditions improve, the Fund may increase its long exposure. The Fund will incorporate a long equity position of between 75% to 100%. The Adviser will use the hedge strategy as a tactical allocation overlay to manage the Fund's overall net exposure. The Adviser expects that the Fund's exposure to equities will range from 10% to 90% net long through the majority of market cycles.

Manager-of-Managers Order

The Fund and the Adviser have been granted by the Securities and Exchange Commission ("SEC"), an order that allows the Adviser to hire a sub-adviser or sub-advisers without shareholder approval (the "Order").

Principal Investment Risks:

The following risks may apply to the Fund's direct investments as well the Fund's indirect risks through investing in Underlying Funds.

- **Credit Risk:** There is a risk that issuers and counterparties will not make payments on securities and other investments held by the Fund, resulting in losses to the Fund. In addition, the credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes. Lower credit quality may lead to greater volatility in the price of a security and in shares of the Fund. Lower credit quality also may affect liquidity and make it difficult for the Fund to sell the security. Default, or the market's perception that an issuer is likely to default, could reduce the value and liquidity of securities held by the Fund, thereby reducing the value of your investment in Fund shares. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings. Credit risk also exists whenever the Fund enters into a foreign exchange or derivative contract, because the counterparty may not be able or may choose not to perform under the contract. When the Fund invests in foreign currency contracts, or other over-the-counter derivative instruments (including options), it is assuming a credit risk with regard to the party with which it trades and also bears the risk of settlement default. These risks may differ materially from risks associated with transactions effected on an exchange, which generally are backed by clearing organization guarantees, daily mark-to-market and settlement, segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from such protections. Relying on a counterparty exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Fund to suffer a loss. If a counterparty defaults on its payment obligations to the Fund, this default will cause the value of an investment in the Fund to decrease. In addition, to the extent the Fund deals with a limited number of counterparties, it will be more susceptible to the credit risks

associated with those counterparties. The Fund is neither restricted from dealing with any particular counterparty nor from concentrating any or all of its transactions with one counterparty. The ability of the Fund to transact business with any one or number of counterparties and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Fund.

- *Emerging Market Risk:* Emerging market countries may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Emerging market economies may be based on only a few industries and security issuers may be more susceptible to economic weakness and more likely to default. Emerging market securities also tend to be less liquid.
- *Equity Risk:* The NAV of the Fund will fluctuate based on changes in the value of the equity securities held by the Fund or underlying funds that invest in U.S. and/or foreign equity securities. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions.
- *Fixed Income Risk:* When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Convertible securities are hybrid securities that have characteristics of both fixed income securities and common stocks and are subject to risks associated with both debt securities and equity securities. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments; or the debtor may pay its obligation later than expected, reducing the returns earned by an investment). These risks could affect the value of a particular investment by the Fund possibly causing the Fund's share price and returns to be reduced and fluctuate more than other types of investments.
- *Foreign Currency Risk:* Currency trading involves significant risks, including market risk, interest rate risk, country risk, counterparty credit risk and short sale risk. Market risk results from the price movement of foreign currency values in response to shifting market supply and demand. Since exchange rate changes can readily move in one direction, a currency position carried overnight or over a number of days may involve greater risk than one carried a few minutes or hours. Interest rate risk arises whenever a country changes its stated interest rate target associated with its currency. Country risk arises because virtually every country has interfered with international transactions in its currency. Interference has taken the form of regulation of the local exchange market, restrictions on foreign investment by residents or limits on inflows of investment funds from abroad. Restrictions on the exchange market or on international transactions are intended to affect the level or movement of the exchange rate. This risk could include the country issuing a new currency, effectively making the "old" currency worthless. The Fund may also take short positions, through derivatives, if the Adviser believes the value of a currency is likely to depreciate in value. A "short" position is, in effect, similar to a sale in which the Fund sells a currency it does not own but, has borrowed in anticipation that the market price of the currency will decline. The Fund must replace a short currency position by purchasing it at the market price at the time of replacement, which may be more or less than the price at which the Fund took a short position in the currency.
- *Foreign Investment Risk:* Foreign investing (including through American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts) involves risks not typically associated with U.S. investments, including adverse fluctuations in foreign currency values, adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards. Investing in emerging markets imposes risks different from, or greater than, risks of investing in foreign developed countries.
- *Futures Risk:* The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the Adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.
- *High Yield (Junk) Bond Risk:* Lower-quality fixed income securities, known as "high yield" or "junk" bonds, present a significant risk for loss of principal and interest. These bonds offer the potential for higher return, but also involve greater risk than bonds of higher quality, including an increased possibility that the bond's issuer, obligor or guarantor may not be able to make its payments of interest and principal (credit quality risk). If that happens, the value of the bond may decrease, and the Fund's share price may decrease and its income distribution may be reduced. An economic downturn or period of rising interest rates (interest rate risk) could adversely affect the market for these

bonds and reduce the Fund's ability to sell its bonds (liquidity risk). Such securities may also include Rule 144A securities, which are subject to resale restrictions. The lack of a liquid market for these bonds could decrease the Fund's share price.

- *Defaulted Securities Risk:* Defaulted securities risk refers to the uncertainty of repayment of defaulted securities and obligations of distressed issuers. Repayment of defaulted securities and obligations of distressed issuers (including insolvent issuers or issuers in payment or covenant default, in workout or restructuring or in bankruptcy or in solvency proceedings) is subject to significant uncertainties. Investments in defaulted securities and obligations of distressed issuers are considered speculative.
- *Issuer-Specific Risk:* The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than those of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.
- *Management Risk:* The NAV of the Fund changes daily based on the performance of the securities and derivatives in which it invests. The Adviser's judgments about the attractiveness, value and potential appreciation of particular asset classes and securities in which the Fund invests (long or short) may prove to be incorrect and may not produce the desired results.
- *Market Risk:* The NAV of the Fund will fluctuate based on changes in the value of the securities and derivatives in which the Fund invests. The Fund invests in securities and derivatives, which may be more volatile and carry more risk than some other forms of investment. The price of securities and derivatives may rise or fall because of economic or political changes. Security and derivative prices in general may decline over short or even extended periods of time. Market prices of securities and derivatives in broad market segments may be adversely affected by price trends in commodities, interest rates, exchange rates or other factors wholly unrelated to the value or condition of an issuer.
- *Model Risk:* Like all quantitative analysis, the Adviser's investment model carries a risk that the mathematical model used might be based on one or more incorrect assumptions. Rapidly changing and unforeseen market dynamics could also lead to a decrease in short term effectiveness of the Adviser's algorithmic model. No assurance can be given that the fund will be successful under all or any market conditions.
- *Option Writing Risk:* If a put or call option purchased by the Fund were permitted to expire without being sold or exercised, the Fund would lose the entire premium it paid for the option. The risk involved in writing a put option is that there could be a decrease in the market value of the underlying future, security, currency or other asset. If this occurred, the option could be exercised and the underlying future, security, currency or other asset would then be sold to the Fund at a higher price than its current market value. The risk involved in writing a call option is that there could be an increase in the market value of the underlying future, security, currency or other asset. If this occurred, the option could be exercised and the underlying future, security, currency or other asset would then be sold by the Fund at a lower price than its current market value.
- *Portfolio Turnover Risk:* A higher portfolio turnover will result in higher transactional and brokerage costs.
- *Short Position Risk:* The Fund's long positions could decline in value at the same time that the value of the short positions increase, thereby increasing the Fund's overall potential for loss. The Fund's short positions may result in a loss if the price of the short position instruments rise and it costs more to replace the short positions. In contrast to the Fund's long positions, for which the risk of loss is typically limited to the amount invested, the potential loss on the Fund's short positions is unlimited. Market factors may prevent the Fund from closing out a short position at the most desirable time or at a favorable price.
- *Small and Medium Capitalization Risk:* Small or medium capitalization companies may have limited product lines, markets or financial resources, and they may be dependent on a limited management group. Securities of smaller companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.
- *Underlying Funds Risk:* The Fund invests in investment companies, including ETFs and mutual funds ("Underlying Funds"). As a result, your cost of investing in the Fund will be higher than the cost of investing directly in investment companies and may be higher than other investment companies that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses. When the Fund invests in Underlying Funds that use margin, leverage, short sales and other forms of financial derivatives, such as options and futures, an investment in the Fund may be more volatile than investments in other mutual funds. Short sales are speculative investments and will cause the Fund to lose money if the value of a security sold short by the Underlying Fund in which the Fund invests, does not go down as the Underlying Fund manager expects. Additional risks of investing in investment companies are described below:

- *Expense Risk:* The Fund invests in Underlying Funds. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in an investment company and may be higher than other mutual funds that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses.
- *Leveraging Risk:* The use of leverage by the Underlying Funds, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, will magnify the Underlying Fund's gains or losses. During periods in which an Underlying Fund is utilizing financial leverage, the fees that are payable to its Adviser as a percentage of the Underlying Fund's assets may be higher than if the Underlying Fund did not use leverage, because the fees are calculated as a percentage of the Underlying Fund's assets, including those purchased with leverage.
- *Management Risk:* When the Fund invests in Underlying Funds there is a risk that the investment advisers of those Underlying Funds may make investment decisions that are detrimental to the performance of the Fund.
- *Mutual Fund Risk:* The strategy of investing in Underlying Funds that are mutual funds could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes you pay. In addition, certain prohibitions on the acquisition of mutual fund shares by the Fund may prevent the Fund from allocating its investments in the manner the Adviser considers optimal. The Fund intends to purchase mutual funds that are either no-load or waive the sales load for purchases made by the Fund. The Fund will not purchase mutual funds that charge a sales load upon redemption, but the Fund may purchase mutual funds that have an early redemption fee. In the event that a mutual fund charges a redemption fee, then you will indirectly bear the expense by investing in the Fund. Mutual funds whose shares are purchased by the Fund will be obligated to redeem shares held by the Fund only in an amount up to 1% of the mutual fund's outstanding shares during any period of less than 30 days. Shares held by the Fund in excess of 1% of a mutual fund's outstanding shares therefore, may be considered not readily marketable securities, which together with other such securities, may not exceed 15% of the Fund's total assets. When the Fund focuses its investments in certain mutual funds, the Fund's portfolio will have a risk profile for such investments that will correspond to that of such mutual funds and Management Risk, described above, increases proportionately.
- *NAV and Market Price Risk:* The market value of the closed-end shares may differ from their NAV. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when shares trades at a premium or discount to NAV.
- *Strategies Risk:* Each Underlying Fund is subject to specific risks, depending on the nature of the fund. These risks could include liquidity risk, sector risk, and foreign currency risk, as well as risks associated with fixed income securities and commodities.

Temporary Investments: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While the Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because shareholders will pay the fees and expenses of the Fund and, indirectly, the fees and expenses of the underlying money market funds. The Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Portfolio Holdings Disclosure: A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAI").

Cybersecurity

The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations,

business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

Investment Adviser: Persimmon Capital Management, LP, 1777 Sentry Parkway West, VEVA 14, Suite 102, Blue Bell, PA 19422, serves as investment adviser to the Fund. Subject to the oversight of the Board of Trustees, the Adviser is responsible for management of the Fund's investment portfolio. The Adviser was established in 1998 for the purpose of advising individuals and institutions. As of September 30, 2018, the Adviser had approximately \$241.8 million in assets under management.

Pursuant to an investment advisory agreement with the Trust, on behalf of the Fund, the Adviser is entitled to receive, on a monthly basis, an annual advisory fee equal of 1.75% of the Fund's average daily net assets. From the Fund's commencement date until May 7, 2014, the Adviser received an annual fee equal to 2.50%. From May 7, 2014 through January 31, 2019, the Adviser received an annual fee equal to 1.99%. The Adviser has contractually agreed to waive management fees and to make payments to limit Fund expenses, until January 31, 2020 so that the total annual operating expenses (excluding (i) any front-end or contingent deferred loads; (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses; (iv) borrowing costs (such as interest and dividend expense on securities sold short); (v) taxes; and (vi) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) of the Fund do not exceed 2.49% of average daily net assets attributable to Class I shares. From the Fund's inception through May 25, 2016, the expense limitation was at 3.99% for Class I shares. From May 25, 2016 through January 31, 2019, the expense limitation was at 2.75% for Class I shares. This fee waiver and expense reimbursement is subject to possible recoupment from the Fund within three years after the fees have been waived or reimbursed, if such recoupment can be achieved within the lesser of the foregoing expense limits or the expense limits in place at the time of recapture. This agreement may be terminated only by the Board of Trustees on 60 days' written notice to the Adviser.

During the year ended September 30, 2018, the Fund paid 1.80% of its average daily net assets to the Adviser after fee waivers. A discussion regarding the basis for the Board of Trustees' renewal of the advisory agreement is available in the Fund's semi-annual report to shareholders dated March 31, 2018.

Portfolio Managers: The Fund is managed on a day to day basis by the portfolio manager(s) listed below. The SAI provides additional information about each portfolio manager's compensation, other accounts managed by each portfolio manager, and the portfolio manager's ownership in the Fund.

Investment Adviser	Portfolio Manager	Experience over the last 5 years
Persimmon Capital Management, LP	Greg Horn	Portfolio Manager of the Fund since inception; President and CEO of the Adviser since 1998.
	Arthur Holly	Portfolio Manager of the Fund since 2014; Chief Investment Officer and Managing Partner of the Adviser since 2014; Head of Investment Solutions, North America, for the Man Group plc. from 2008 to 2013.
	Timothy Melly	Portfolio Manager of the fund since June 2015; Vice President of Research of the Adviser since 2014. Director of Investment Research at M Financial Planning Group from 2005 to 2014.

HOW SHARES ARE PRICED

Shares of the Fund are sold at NAV. The NAV of the Fund is determined at close of regular trading (normally 4:00 p.m. Eastern Time) on each day the New York Stock Exchange (“NYSE”) is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund’s securities are valued each day at the last quoted sales price on each security’s primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid ask prices on such exchanges. Securities primarily traded in the National Association of Securities Dealers’ Automated Quotation System (“NASDAQ”) National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

If market quotations are not readily available, securities will be valued at their fair market value as determined using the “fair value” procedures approved by the Board of Trustees. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board of Trustees has delegated execution of these procedures to a fair value committee composed of one or more officers from each of the (i) Trust, (ii) administrator, and (iii) Adviser. The committee may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board of Trustees reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund’s securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of some of the Fund’s portfolio securities may change on days when you may not be able to buy or sell Fund shares.

In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund’s portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund’s fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine NAV, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund’s assets that are invested in one or more open-end management investment companies registered under the Investment Company Act of 1940, as amended (the “1940 Act”), the Fund’s NAV is calculated based upon the NAVs of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

HOW TO PURCHASE SHARES

Shares of the fund are offered at the public offering price, which is NAV per share. The Fund has a minimum initial investment requirement of \$100,000 and a minimum subsequent investment requirement of \$100. You may purchase shares of the Fund by sending a completed application form to the following address:

via Regular Mail
PERSIMMON LONG/SHORT FUND
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, Nebraska 68154

or Overnight Mail
PERSIMMON LONG/SHORT FUND
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

Purchase through Brokers: You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent.

Purchase by Wire: If you wish to wire money to make an investment in the Fund, please call the Fund at 1-855-233-8300 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automatic Investment Plan: You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 1-855-233-8300 for more information about the Fund's Automatic Investment Plan.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to "Persimmon Long/Short Fund." The Fund will not accept payment in cash, credit cards or third party checks. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Gemini Fund Services, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check returned to the transfer agent for insufficient funds.

When Order is Processed: All shares will be purchased at the NAV per share (plus applicable sales charges, if any) next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (Eastern Time) will be processed on that same day. Requests received after 4:00 p.m. will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order. "Good order" means your purchase request includes:

- the name of the Fund and share class;
- the dollar amount of shares to be purchased;
- a completed purchase application or investment stub; and
- check payable to the "Persimmon Long/Short Fund."

Retirement Plans: You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-855-233-8300 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

HOW TO REDEEM SHARES

Redeeming Shares: The Fund typically expects that it will take up to three business days following the receipt of your redemption request to pay out redemption proceeds by check or electronic transfer. The Fund typically expects to pay redemptions from cash, cash equivalents, proceeds from the sale of Fund shares, any lines of credit, and then from the sale of portfolio securities. These redemption payment methods will be used in regular and stressed market conditions. You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

via Regular Mail
PERSIMMON LONG/SHORT FUND
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, Nebraska 68154

or Overnight Mail
PERSIMMON LONG/SHORT FUND
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts except retirement accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account.

The proceeds will be sent by mail to the address designated on your account or wired directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 1-855-233-8300. IRA accounts are not redeemable by telephone.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Automatic Withdrawal Plan: If your individual accounts, IRA or other qualified plan account have a current account value of at least \$10,000, you may participate in the Fund's Automatic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$100 on specified days of each month into your established bank account. Please contact the Fund at 1-855-233-8300 for more information about the Fund's Automatic Withdrawal Plan.

Redemptions in Kind: The Fund reserves the right to honor requests for redemption or repurchase orders by making payment in whole or in part in readily marketable securities ("redemption in kind") if the amount is greater than the lesser of \$250,000 or 1% of the Fund's assets. The securities will be chosen by the Fund and valued under the Fund's NAV procedures. A shareholder will be exposed to market risk until these securities are converted to cash and may incur transaction expenses in converting these securities to cash.

When Redemptions are Sent: Once the Fund receives your redemption request in "good order" as described below, it will issue a check based on the next determined NAV following your redemption request. If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank.

Good Order: Your redemption request will be processed if it is in “good order.” To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

Redemption Fee: The Fund will deduct a 1.00% redemption fee on your redemption amount if you sell your shares within 60 days of purchase. Shares held longest will be treated as being redeemed first and shares held shortest as being redeemed last. Shares held for 60 days or more are not subject to the 1.00% fee. Redemption fees are paid to the Fund directly and are designed to offset costs associated with fluctuations in Fund asset levels and cash flow caused by short-term shareholder trading.

Waivers of Redemption Fees: The Fund has elected not to impose the redemption fee for:

- redemptions and exchanges of Fund shares acquired through the reinvestment of dividends and distributions;
- certain types of redemptions and exchanges of Fund shares owned through participant-directed retirement plans;
- redemptions or exchanges in discretionary asset allocation, fee based or wrap programs (“wrap programs”) that are initiated by the sponsor/financial adviser as part of a periodic rebalancing;
- redemptions or exchanges in a fee based or wrap program that are made as a result of a full withdrawal from the wrap program or as part of a systematic withdrawal plan;
- involuntary redemptions, such as those resulting from a shareholder's failure to maintain a minimum investment in the Fund, or to pay shareholder fees; or
- other types of redemptions as the Adviser or the Trust may determine in special situations and approved by the Trust's or the Adviser's Chief Compliance Officer.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Low Balances: If at any time your account balance in the Fund falls below \$250, the Fund may notify you that, unless the account is brought up to at least \$250 within 60 days of the notice; your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below \$250 due to a decline in NAV.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Board of Trustees has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently uses several methods to reduce the risk of market timing. These methods include, but are not limited to:

- Committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's Market Timing Trading Policy; and
- Assessing a 1% redemption fee for shares sold less than 60 days after purchase.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

Based on the frequency of redemptions in your account, the Adviser or transfer agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's Market Timing Trading Policy and elect to (i) reject or limit the amount, number, frequency or method for requesting future purchases into the Fund and/or (ii) reject or limit the amount, number, frequency or method for requesting future exchanges or redemptions out of the Fund.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial advisor) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

Any sale or exchange of the Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.)

The Fund intends to distribute substantially all of its net investment income and net capital gains annually in December. Both distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation until retirement proceeds are paid out to the participant.

Your redemptions, including exchanges, may result in a capital gain or loss for federal tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisors to determine the tax consequences of owning the Fund's shares.

DISTRIBUTION OF SHARES

Distributor: Northern Lights Distributors, LLC, 17605 Wright Street, Omaha, Nebraska 68130, is the distributor for the shares of the Fund. Northern Lights Distributors, LLC is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. Shares of the Fund are offered on a continuous basis.

Additional Compensation to Financial Intermediaries: The Fund's distributor, its affiliates, and the Adviser and its affiliates may, at their own expense and out of their own assets including their legitimate profits from Fund-related activities, provide additional cash payments to financial intermediaries who sell shares of the Fund or assist in the marketing of the Fund. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the Rule 12b-1 fees and any sales charges that are disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The distributor may, from time to time, provide promotional incentives to certain investment firms. Such incentives may, at the distributor's discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional compensation.

Householding: To reduce expenses, the Fund mails only one copy of a Prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-855-233-8300 on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance for the period of the Fund's operations. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by RSM US LLP whose report, along with the Fund's financial statements which are incorporated by reference into the SAI, and are included in the Fund's September 30, 2018 annual report, which is available at no charge upon request.

Persimmon Long/Short Fund FINANCIAL HIGHLIGHTS

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout Each Year

	Class I				
	Year Ended September 30, 2018	Year Ended September 30, 2017	Year Ended September 30, 2016	Year Ended September 30, 2015	Year Ended September 30, 2014
Net asset value, beginning of year	\$ 11.23	\$ 10.41	\$ 10.90	\$ 11.02	\$ 10.62
Income (loss) from investment operations:					
Net investment loss (1)	(0.31)	(0.28)	(0.37)	(0.33)	(0.26)
Net realized and unrealized gain on investments (2)	0.93	1.10	0.40	0.56	0.66
Total from investment operations	0.62	0.82	0.03	0.23	0.40
Less distributions from:					
Net realized gains	(0.67)	—	(0.52)	(0.35)	0.00 *
Total distributions	(0.67)	—	(0.52)	(0.35)	0.00 *
Redemption fees collected	—	—	—	—	0.00 *
Net asset value, end of year	\$ 11.18	\$ 11.23	\$ 10.41	\$ 10.90	\$ 11.02
Total return (3)	5.80%	7.88%	0.17%	2.17%	3.77%
Net assets, at end of year (000s)	\$ 31,633	\$ 23,079	\$ 27,518	\$ 28,549	\$ 29,752
Ratios/Supplemental Data:					
Ratio of gross expenses to average net assets before fee waiver/recapture (4)(6)(7)	3.88%	4.17%	4.33%	3.93%	4.09%
Ratio of net expenses to average net assets after fee waiver/recapture (6)(7)	3.69%	3.86%	4.33%	3.93%	3.83%
Ratio of net investment loss to average net assets before fee waiver/recapture (5)(7)	(2.96)%	(2.97)%	(3.56)%	(2.97)%	(2.64)%
Ratio of net investment loss to average net assets after fee waiver/recapture (5)(7)	(2.78)%	(2.66)%	(3.44)%	(2.97)%	(2.39)%
Portfolio Turnover Rate	263%	86%	207%	214%	181%

* Represents less than \$0.01 per share.

(1) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.

(2) Realized and unrealized gains per share in this caption are balancing amounts necessary to reconcile the change in net assets value per share for the period, and may not reconcile with aggregate gains and losses in the Statement of Operations due to timing of share transactions during the year.

(3) Total returns shown exclude the effect of applicable sales charges and redemption fees and assumes reinvestment of all distributions, if any. Total returns would have been lower absent the fee waiver.

(4) Represents the ratio of expenses to average net assets absent fee waivers and/or fees recaptured by the Adviser.

(5) Recognition of net investment loss by the Fund is affected by the timing of the declaration of dividends by the underlying investment companies in which the Fund invests.

(6) Excluding interest expense and dividends on securities sold short, the following ratios would have been:

Gross expenses to Average net assets	2.93%	3.09%	2.89%	2.99%	3.24%
Net expenses to average net assets	2.75%	2.78%	2.89%	2.99%	2.99%

(7) Ratio does not include the expenses of other investment companies in which the Fund invests.
