D. Please indicate below whether you would like to allocate these funds differently from the way you did in the Elected Investment Allocation on your Enrollment Application for LoneStar 529 Plan. Please note this will only affect your rollover dollars.

Target Enrollment Year Options: The asset allocation between equities, bonds, and cash automatically adjusts each year as the enrollment year approaches. Please select a portfolio that closely approximates the year when funds will start to be drawn. Typically, families assume their child will need their education savings at age 18. Once you've estimated when you expect your child will need to use their savings, select the target date portfolio that represents the date closest to your estimated date of enrollment. For example, if your child was born in 2021 and you anticipate they will begin college at 18 years of age, they may need their college savings in the year 2039 (2021 plus 18). This means you would select the 2038-2039 Target Enrollment Year Portfolio. If there is no corresponding Portfolio select the one closest to the enrollment year of the child.

Risk-based Options: The assets will remain in your selected portfolio(s) until you update your Investment Election.

Individual Asset Class Options: The assets will remain in your selected portfolio(s) until you update your Investment Election.
